Tiki Cooler Project Sheet

- From "Endless Summer Party," on page 71 of the August/September issue of *Sandra Lee Semi-Homemade* magazine

1.

2.

3.

Materials:

- watertight container to hold ice and beverages
- stand to elevate container
- reed fencing or curtain (we used a 3x14-foot piece from a garden center)
- twine

How-to:

1. Place container on stand, and wrap reed fencing around container.
2. Secure fencing with twine. (If stand and container are taller than the width of fencing, cut fencing to lengths 2 times the diameter of container. Wrap fencing, stacking and overlapping as needed, to cover both. Secure with twine.)
3. Tuck greenery into twine, if desired.
4. Add ice and beverages.

4.

To keep a bottle opener available, attach twine to opener, and drape around a fresh pineapple for easy access.
